معرفی نرم افزار ENDNOTE

✘ **اندنوت (EndNote)** محصولی از شرکت تامسون رویترز (Thomson Reuters) نرم افزاری جهت ذخیره و سازماندهی منابع مورد استفاده در روند پژوهش می باشد. این برنامه قابلیت جستجوی مقالات در پایگاه ها و ذخیره کردن اطلاعات مورد نیاز آن ها را فراهم می کند. با این برنامه می توان منابعی که برای نوشتن **پروپوزال تحقیقاتی، پایان نامه، مقاله، کتاب** و هر نوشته تحقیقاتی دیگر مورد استفاده قرار گرفته است را مدیریت و آن ها را در یک فرمت نوشتاری استاندارد ذخیره نمود. اندنوت دارای فرمت مجلات مختلف می باشد، بنابراین با کمک آن می توانید منابع مقاله خود را مطابق آن مجله به طور خودکار و سریع تغییر دهید.

قابلیت های نرم افزار ENDNOTE

- × انجام کامل ترین بررسی منابع (Literature Review) برای پروپوزال تحقیقاتی، پایان نامه، مقاله، و کتاب
- × انجام بهترین طبقه بندی برای دسترسی به منابع و مطالعه آنها
- × جستجوی آسان منابع پژوهشی مورد استفاده
- × پیدا کردن متن کامل (Full Text) مقالات
- × نوشتن یا ویرایش منابع پروپوزال تحقیقاتی، پایان نامه، مقاله و کتاب با دقت و سرعت بالا
- × وارد کردن منبع به متن پروپوزال تحقیقاتی، پایان نامه، مقاله و کتاب و همچنین اضافه شدن خودکار آن به فهرست منابع در انتهای فصل یا انتهای سند با یک کلیک
- × تغییر فرمت منابع مقاله بر اساس مجلات مختلف با یک کلیک
- × طبقه بندی اشکال، جداول و سایر فایل ها
- × جستجو آنلاین منابع
- × وارد نمود اطلاعات منابع تنها از طریق وارد کردن فایل PDF مقالات

شروع کار با نرم افزار ENDNOTE

۱. ابتدا نرم افزار EndNote را بر روی سیستم رایانه ای خود نصب کنید.
۲. بعد از نصب، برنامه را اجرا کنید.

کار با نرم افزار ENDNOTE

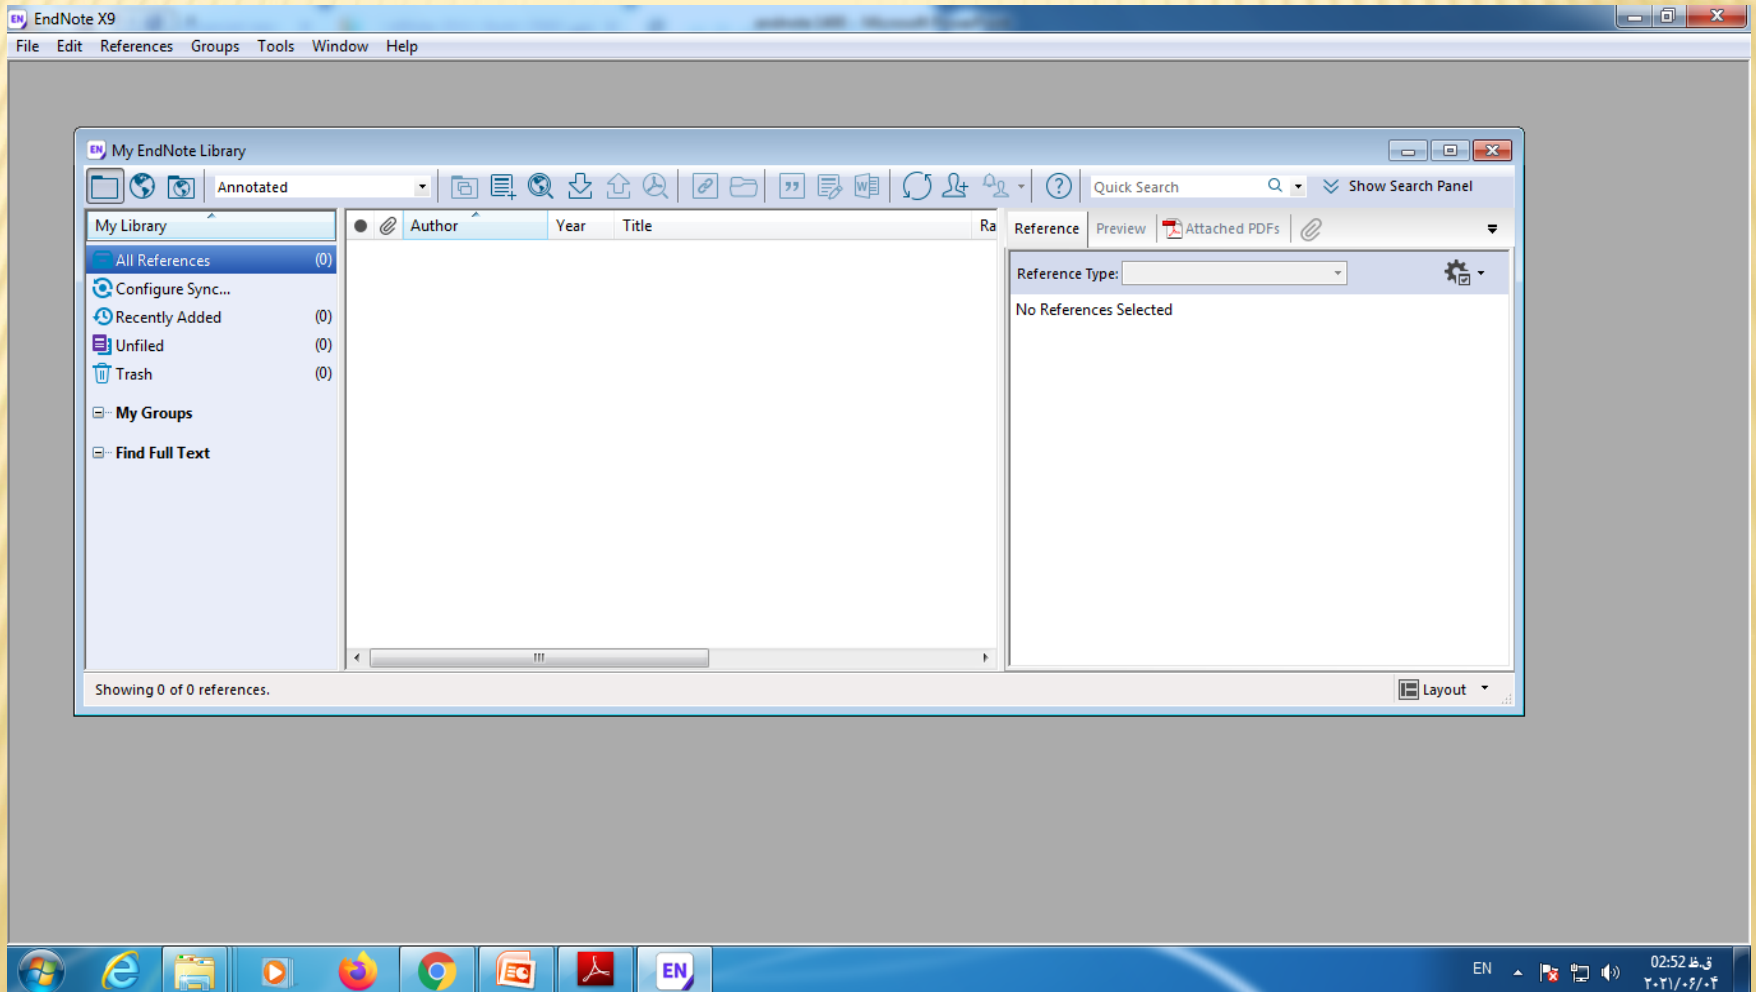

✘ بعد از باز کردن نرم افزار، پنجره زیر نمایان می شود. برای کار کردن در محیط نرم افزار ابتدا باید یک کتابخانه شخصی برای خود باز کنید، برای باز کردن کتابخانه شخصی به صورت زیر عمل کنید:

The screenshot shows the PubMed.gov search results page for the query "Obstetrics and Gynecology". The page includes a search bar, navigation links like "Advanced", "Create alert", and "Create RSS", and a "Search" button. Below the search bar, there are buttons for "Save", "Email", and "Send to", along with sorting options "Sorted by: Best match" and "Display options".

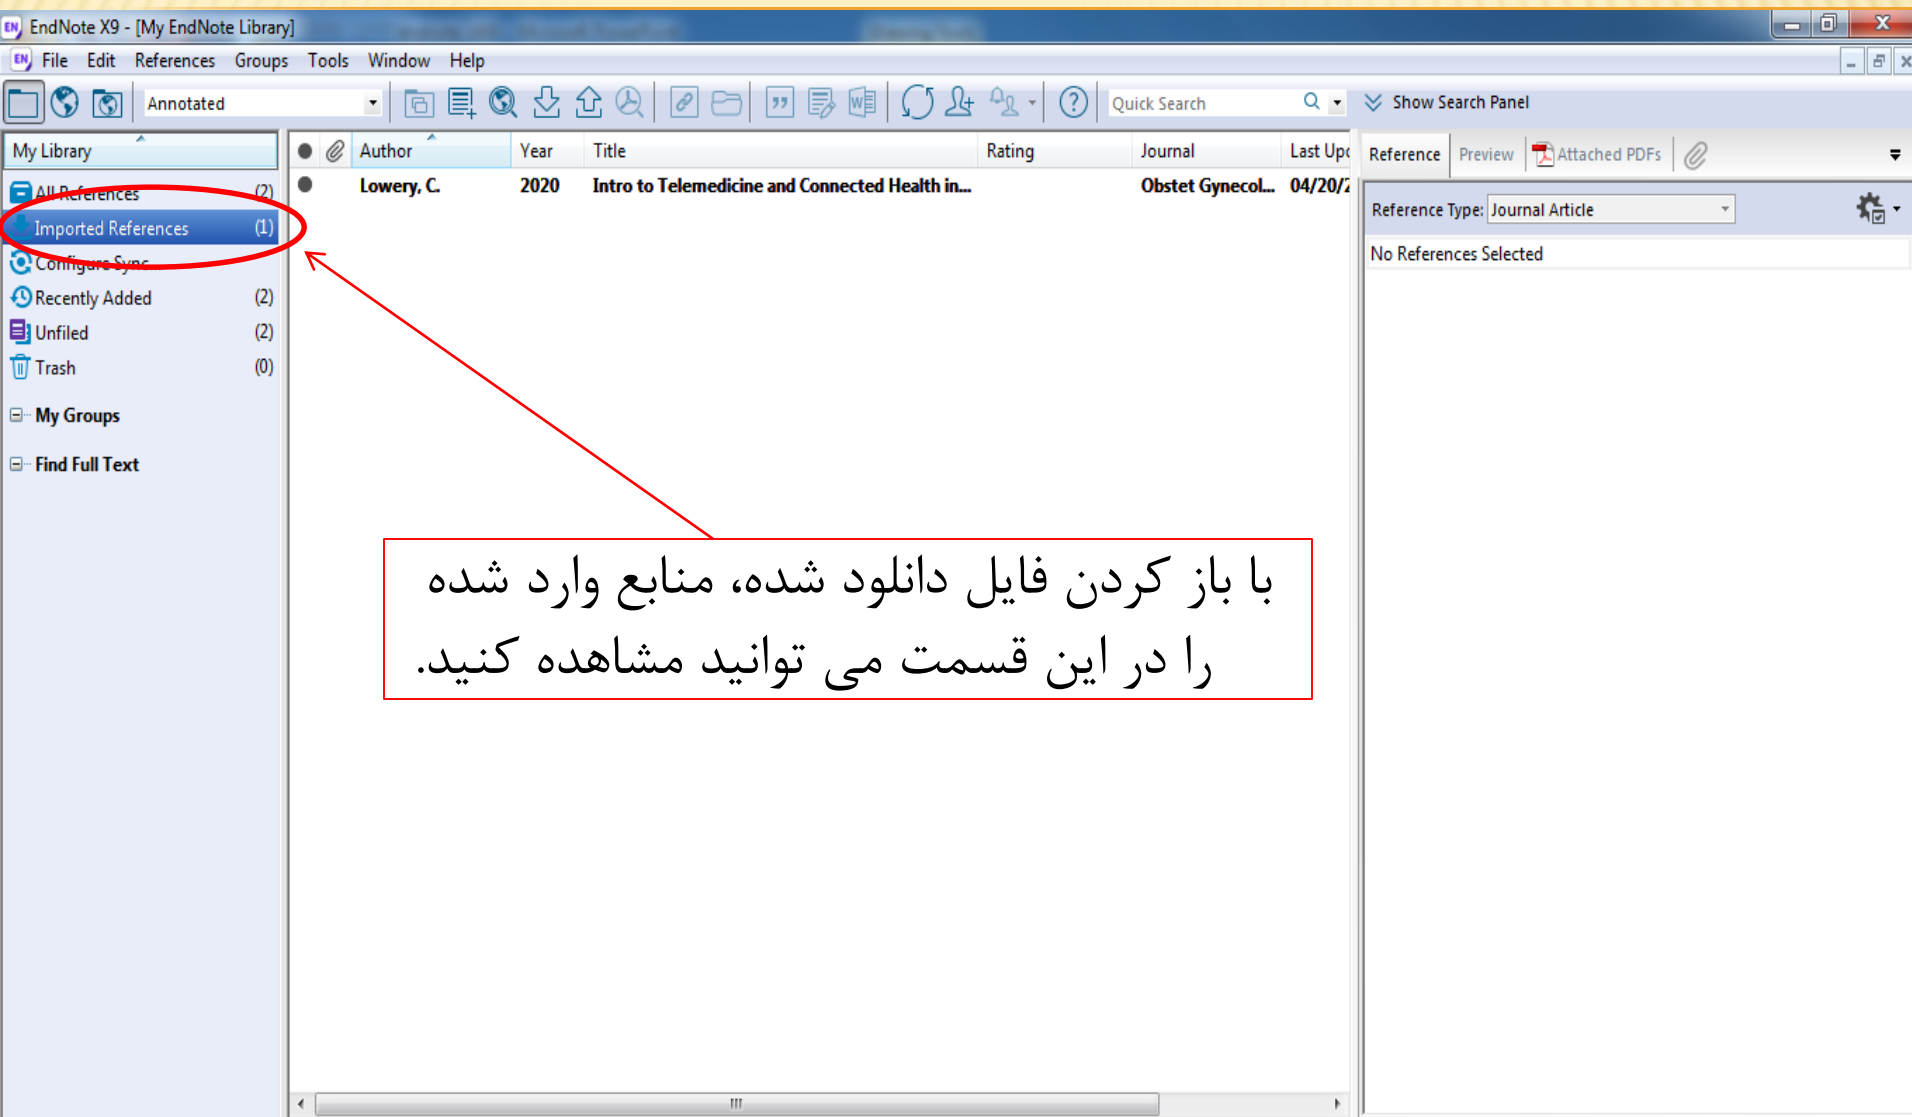

A red box highlights the "Create a file for external citation management software" section, which contains a "Selection (1)" dropdown and a "Create file" button circled in red. A red arrow points from this section to a red box containing the text "فایل نهایی EndNote" (Final file EndNote).

Below the "Create file" section, the search results are displayed. The first result is "Intro to Telemedicine and Connected Health in **Obstetrics and Gynecology**." by Lowery C. The citation information includes "Obstet Gynecol Clin North Am. 2020 Jun;47(2):xv-xvi. doi: 10.1016/j.ogc.2020.03.001." and "PMID: 32451025".

At the bottom left, a red circle highlights the download icon and the filename "pubmed-Obstetrics.nbib". A red arrow points from the "Create file" button to this filename.

The Windows taskbar at the bottom shows the Start button, Internet Explorer, File Explorer, VLC, Firefox, Chrome, Word, PDF Reader, and EndNote (EN) applications. The system tray on the right shows the date and time as 05:05 on 20/21/20/04.

"Trans* Pregnancy and Lactation: A Literature Review from a Nursing Perspective." *International Journal of Environmental Research and Public Health*. DOI: 10.3390/ijerph17030384

Abstract: Pregnancy and lactation involve two aspects that are socially and culturally associated with women. However, there are a few biological differences between male and female breast tissue. Lactation and pregnancy are viable processes that do not depend on sex. Even for the latter, it is only necessary to have an organ capable of gestation. Ways to favor mammogenesis and lactogenesis in trans* women have been established. There are protocols to promote lactation in trans* women, usually used for adoptive mothers or those whose children have been born through gestational surrogacy. Chestfeeding a baby could be the cause of feelings as diverse as gender dysphoria in the case of trans* men, and euphoria and affirmation of femininity in trans* women. This study involves a review of the available scientific literature addressing medical aspects related to pregnancy and lactation in trans* individuals, giving special attention to nursing care during perinatal care. There are scarce studies addressing care and specifically nursing care in trans* pregnancy and lactation. Our study indicates the factors that can be modified and the recommendations for optimizing the care provided to these individuals in order to promote and maintain the lactation period in search of improvement and satisfaction with the whole process.

Keywords: nursing; nursing care; perinatal care; transgender individuals; gender dysphoria; maternal lactation; pregnancy; lactation

1. Introduction

A transgender, or trans*, person is someone who does not feel they identify with their sex assigned at birth (the * symbol is meant to be inclusive of all identities/genders). Trans* people experience their gender as different to that normatively expected of their assigned sex. This identity is independent of genotype, sexual orientation, and behavior [1–3]. This discrepancy can potentially be a source of gender dysphoria, and experiences of distress or anxiety with respect to the gender and the physical body [4]. To date, no epidemiological studies have been conducted reporting the incidence and prevalence of trans* identities [5]. Studies, such as that conducted by Winter et al., have estimated that there are between eight and twenty-five million people worldwide who identify themselves as

In this paper, I argue for the need to shift the focus of nursing research regarding breastfeeding from that of individual responsibility to include a more system-focused, population health approach. In the 2011, "Call to Action to Support Breastfeeding," the U.S. Surgeon General called attention to the pervasive disparities in breastfeeding outcomes in the United States. A plethora of nursing research exists aimed at addressing these disparities; however, this research leans toward a neoliberal perspective, mainly focusing on individual factors and failing to address the systemic inequities contributing to these disparities.

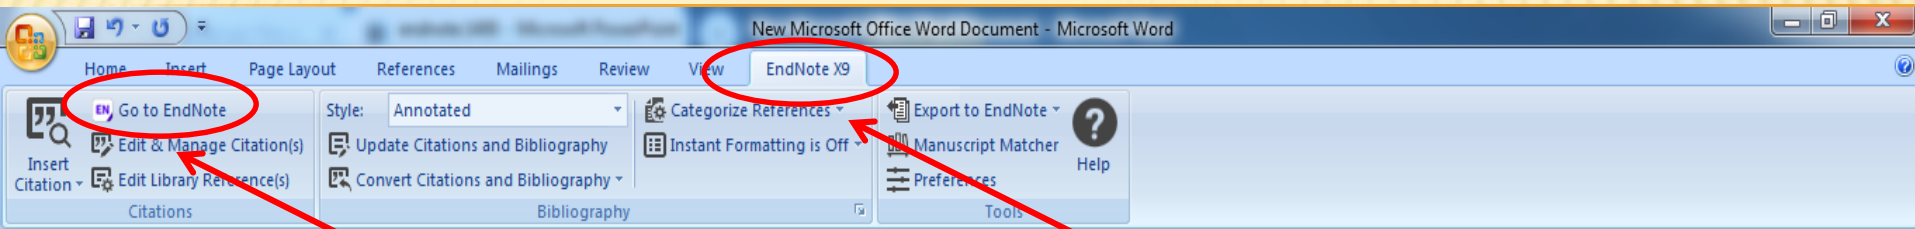

A shift in nursing science that focuses research at a population level would more effectively support addressing disparities in breastfeeding outcomes and embrace a commitment to justice. In focusing at a population level, specific inequities that must be addressed include negative history of breastfeeding in the Black population, systemic racism, and gender inequality.

Critical research methodologies are proposed as useful approaches to address these inequities. By engaging in this level of research and using a critical lens, nurse scientists broaden the scope of care to include the entire population, motivate needed social and policy change, facilitate the choice to breastfeed, and ultimately eliminate breastfeeding disparities.
